

Woody Buick GMC is seeking an experienced Journeyman Technician. Established individuals seeking to make the money they deserve. We are looking for a technician with the ability to diagnose, repair and a true understanding of why we do multi-point inspections on vehicles.

It is a full time Local 701 Union position; Welfare, Pension and 401k Funds are available. Join a growing team in a high traffic shop. Extensive training is available to those who are career focused!

We are willing to pay over scale for very well qualified transmission and diesel technicians.

Job Responsibilities:

- Perform thorough multipoint inspections
- Perform work specified on maintenance and repair orders with efficiency in accordance with dealership and/or General Motors standards
- Diagnose and repair vehicle automotive systems including engine, transmission, electrical, steering, suspension, braking, air conditioning, etc. to specification
- Provide labor and time estimates for additional automotive repairs
- Explain mechanical diagnoses and required repairs in a non-technical manner to service advisors and customers
- Continuously learn new technical information and techniques in formal training sessions in order to stay abreast with rapidly changing technology.
- Inspect and test new vehicles and record findings so that necessary repairs can be made.

Job Requirements:

As a Journeyman Technician (Automotive Mechanic), you should be experienced and aware of the current automotive technologies and be a persistent problem solver. We have determined some factors that may enable your success as an Automotive Technician:

- Minimum of three years of experience as a journeyman technician (General Motors preferred not required)
- Experience with automatic transmission and diesel is a plus
- Valid Journeyman Card
- Hold a minimum of three Automotive Service Excellence (ASE) certifications
- Maintain current factory training
- Hold a valid driver's license
- Team oriented, flexible, and focused on maintaining a high level of customer service
- Working knowledge of shop equipment such as wheel and tire equipment, alignment system, diagnostic equipment, AC equipment
