"I am extremely thankful I went to this wellness event and had my carotids checked. I learned I may have at least a 70% carotid artery blockage. I took my report to my doctor and they did some further testing. They found the artery to my kidney was critically blocked and I had a critical blockage in my heart. I had 3 serious blockages and I had no symptoms. I quit smoking in 2011 but I still have issues with my cholesterol and blood pressure. In a year, my blockage increased from a moderate amount to a critical amount. I understand the importance of getting checked yearly now. I have had quite a few surgeries since the screening. Based off my family history, I am confident I would've had a heart attack and died had I not gotten this lifesaving screening."
